

SnapExpansion[®] Support for DynamicRAID Systems with 10TB or Larger Drives

June 2018

When fully populated with 10TB or larger disk drives, SnapServer[®] DX2 and XSR120 servers support a maximum of three (3) SnapExpansion units when running GuardianOS 7.7 or earlier in DynamicRAID[®] mode. Servers in Traditional RAID mode support the standard maximum of seven (7) expansion units with any capacity drive.
