

SnapServer Supported Drives

SPECIFICATION SHEET

The drives below are supported by SnapServer XSR models according to the following:
 R = recommended
 S = supported
 NS = not supported

NOTE:
 -"S" supported may exhibit increased noise or reduced performance compared to "R" recommended.
 -Do not mix drives with different RPM in the same column of drive slots on the server.

The following drive types are not supported:
 -Desktop grade
 -Variable speed ("green")
 -Native 4K sector (except 512 translation mode)
 -Shingled magnetic recording (SMR)

Manufacturer	Drive Family	Vendor Model	Drive RPM	Drive Capacity	Desktop	1U	2U	Notes
